Supporting Statement

Our report concludes that there was a minimal Gender pay gap on mean and median salaries between male and female employees. We are therefore confident that men and women are paid equally for doing equivalent jobs across our business.

Our bonus payments are for the large part linked to overall individual branch performance and in some cases linked to specific job roles.

Covers operates within the Builders Merchants industry; a traditionally male-dominated sector. Whilst Covers proportion of female employees remains low at 20% we remain committed to finding ways to attract more females into our business.

We confirm the information and data reported is accurate as of the snapshot date 5 April 2021.
