Welcome

Landscaping for living

At Covers, we offer a full range of quality landscaping products that will inspire and excite.

Whether its replacing your driveway or creating the ideal area to relax and unwind, we have everything you need for designing stylish and stunning outdoor spaces.

Our landscaping specialists are on hand to answer your questions and will help you select the best solutions to meet your needs.

Decorative Stones

Cotswold

A light cream angular chipping suitable for paths or drives.

Composite Decking

Highly durable and extremely low maintenance, composite decking is an ideal alternative to traditional timber decking. With an array of colours to choose from, it's the contemporary solution for creating striking outdoor living areas.

Fence Panels

Siesta Fence Panel

A brick effect panel using contemporary timber, effect can be seen from both sides of the panel.

Artificial Grass

Utopia

Natural dark tones this exceptional grass is a show stopper for the ultimate garden.

Garden Lighting

Stainless Steel Bollards

Ideal for illuminating pathways, plants, shrubs, decking & features.

Useful Information

General Technical Information 138

Be inspired...

Go to page 13 for Bradstone's exclusive Porcelain range **Tatra**®.

Choosing the right Paving for your project

Porcelain

Our beautiful range of porcelain paving truly gives you the best of both worlds.

Porcelain paving is formed by baking a mixture of clay, sand and other minerals in a high temperature kiln producing an incredibly durable and non-porous material.

Being resistant to water absorption ensures that porcelain paving requires lower maintenance. There's no need to apply a sealant as pavers are already stain and mildew resistant. Liquids such as oils and chemicals cannot penetrate the surface, so they can easily be cleaned away. An exceptionally dense material, porcelain paving is extraordinarily hard-wearing.

Porcelain paving is produced to be used outdoors, meaning it has a slightly rougher surface texture than indoor tiles with a smoother surface.

- Hard-wearing, scratch resistant
- Slip resistant
- Machine cut for a perfect thickness
- A premium high quality product

Concrete

A range of concrete paving that combines style, strength and design flexibility.

Concrete, or reconstituted stone paving, is formed by moulding a mix of stone, sand, cement and water before being left to cure. The result is a strong, durable paving with endless colour and surface texture options, combinations of which can help to create a contemporary or traditional look within your garden.

Concrete paving moulds are created from perfect versions of the desired shape and profile.

- Strong and hard-wearing
- Traditionally available in riven textured or smooth

Natural Stone

Natural stone encompasses ranges using natural sandstone, limestone, granite and slate.

All ethically sourced from around the world, each paver is different from the last with variations of colour and texture determined by nature over thousands of years.

All natural stone is incredibly strong and hard-wearing. We go to extra lengths to source only the finest quality stone.

- Strong and hard-wearing
- Calibrated machine cut for a perfect thickness

Be inspired...

Complete your patio with a range of accessories and finishing touches to create your dream garden.

When it comes to your garden and outdoor space this summer, there's a lot of different colours you could use to create a tranquil space. One colour you should embrace throughout your designs is white, it's becoming the new colour of the summer. With a white backdrop, varying sizes of foliage and adding some eye catching flowers to fill the space, you can create a peaceful haven for any outdoor space.

Premium

Image: Mode® Profiled Beige Paving

BRADSTONE

Mode® Profiled

Mode® Profiled is a range of beautiful porcelain paving that adds modern sophistication to any garden. It has a fine riven texture featuring mica crystals to add interest and sparkle to your patio.

This paving is impactful, lower maintenance and does not fade. Available in 600 x 600mm, 600 x 300mm and 900 x 150mm in all four shades and 900 x 450mm in Silver Grey and Graphite. We offer a 10mm version to allow you to use this paving indoors.

We also have a range of steps, edging and coping that allow you to create a coordinated look for your garden. For general technical information go to page 138.

BRADSTONE

Manzano®

Manzano® incorporates a distinctive and varied colour blend to create the ultra contemporary appearance of polished concrete. It is strong, durable, lower maintenance and does not fade.

Why not incorporate Manzano® Mosaics in your garden design to give it a more distinct appearance.

Available in 1200 x 600mm and 600 x 600mm single sized pavers.

Mode® Textured

Mode® Textured has a finely grained finish to create the feel of the highest quality natural sandstone. It also has all the benefits of porcelain paving; strong, durable and does not fade. Available in two shades, you can create the ultimate outdoor space. Available in a single size 600 x 600mm paver, a 10mm version is also available to order to allow you to use this paving indoors.

Thickness: 20mm

Sizes available:

600 x 600mm

Shell

Graphite

Main Image: Mode® Textured Shell Paving

Don't forget

Jointing Compound

It's easy to use. You can apply EASYGrout into the joints by using a squeegee. Suitable for use with porcelain.

Slurry Primer

Helps strengthen the bond between the paving and the sub-base. Porcelain paving needs the additional adhesive from this slurry to bond successfully with the mortar bed.

Best Seller

Arenaria®

Designed to replicate the look of randomly laid natural sandstone and with consistently accurate sizes, the 18.36m² Arenaria® patio pack is laid with thin joints for a traditional feel and a contemporary twist.

Your guide to Driveways

Your driveway is usually the first thing you see when approaching your house. You therefore want it to provide a statement about your home, to invite people in, as well as to provide easy access.

Our driveway paving product range will help you achieve all of these objectives – and can add real long term value to your home. Our blocks come in different depths for different uses as follows:

- Light usage: 50mm blocks for driveways, patios, and pathways – suited to normal family cars.
- Medium usage: 60mm blocks for adopted highways, hardstanding areas and other roads – suited for occasional delivery lorries.
- Heavy duty usage: 80mm blocks for heavy duty pavements, for instance for oil deliveries, refuse lorries, etc.

Concrete Paving

Concrete blocks not only offer a robust solution for your driveway paving but also come in a multitude of styles, textures and colours. Whether you want to achieve a contemporary look with smooth surfaces and clean lines, or a more traditional style with aged, tumbled surfaces, the design flexibility and easy installation of concrete block paving makes it a popular choice.

Permeable Paving

This has been proven to be a highly effective way of minimising surface water run-off whilst giving you all the aesthetic options you need to create a beautiful driveway. Some designs will even collect water for reuse in the garden. Did you know that – If you are paving an area greater than 5m² – homeowners have a legal obligation to avoid surface water draining onto public highways from their property? Brett can offer you a number of options to meet this responsibility without requiring planning permission. Look out for the icon as you browse our driveway products.

Walling, Edging, Coping & Stepping Stones

Image: Natural Stone Fossil Buff Walling Slips

Natural Stone Walling Slips

This range of walling slips comes in Natural Slate and Natural Sandstone with a set of complementary shades. For a superb natural stone look, they just stick to a block wall using Bradbond walling adhesive. The slips are Z-shaped giving the appearance a random look. There are also end pieces available to finish off straight walls. Natural Stone or Porcelain is ideal as complementary coping for these walls.

Applications: Suitable for garage thresholds, pedestrian precincts, patios, paths and block paving

RainDrain Brickslot B 125

Applications: Suitable for block paving, driveways and small private car parks

Your complete guide to

Timber Decking

Our range of timber decking has been pressure treated to ensure extra durability and low maintenance. Machine grooved and kiln dried, timber decking will add a natural effect to any outdoor space.

- Water resistant
- Rot, fungi and moisture resistant
- Kiln dried for increased stability
- Made from responsibly sourced wood
- Can be clinched, planed, drilled and sawn

Hardwood or softwood decking?

Hardwoods are so-called as they are sourced from trees that grow slowly, meaning the wood has more time to mature. In comparison, Softwoods are sourced from fast-growing trees, but this doesn't mean softwoods can't be tough too.

Hardwood decking is often a popular choice because hardwoods are typically more resilient against rot and degeneration. However, softwood decking boards are also a great choice with a little extra maintenance.

Decking boards are a great solution for covering concrete that has been damaged and become unsightly over a period of time, and decking boards are a great deal nicer.

Decking...

Composite Decking

Our range of composite decking will suit all tastes and styles and is a great alternative to timber. Highly durable, easy to install and simple to maintain, it's the perfect addition to any garden.

- Easy to maintain
- Will not warp, splinter or rot
- Slip resistant
- UV resistant
- Contains recycled materials
- Stain resistant

Aluminium Decking

Our range of aluminium decking is another great alternative to timber. With an advanced design creates a heat resistant board, which is comfortable to walk on, even on hot days.

- Non-combustible
- Non-slip
- Hard wearing
- Quick and easy to install
- Made from recycled aluminium, and fully recyclable at end of life

Timber Decking

Image: IRO Driftwood Decking

CoverDek is Covers own branded decking that is produced in our mill at Chichester. The CoverDek system we provide includes Softwood or Hardwood, Baserails, Newels, Handrails, Spindles and Joists. The system has been designed to enable the end user to construct a complete deck at an affordable cost.

Covers Treated Reversible Decking is high pressure treated with Tanalith 'E' (or similar) to enhance resistance to water and damp. Each piece is kiln dried to help improve stability, strength, durability and straightness, making it suitable for use in your outdoor space. The decking boards are reversible so you can choose a style that will suit your home.

Imported from Sweden or the Baltic States most of our timber is grown in managed forests with extremely long growing cycles, our Timber has an extremely high yield from C16 graded timber to suit all your building requirements.

IRO Timber Decking

Created by combining the ancient Japanese process of Yakisugi with the latest timber technology, IRO is a beautiful and uniquely coloured decking timber that will add charm and character to a range of outdoor spaces.

A low-maintenance, long-lasting alternative to traditional decking that is UV stable and 100% HVOC-free, meaning the product is both child-friendly and pet-friendly.

Manufactured using a seven-step process, IRO is also high pressure treated and coated in a protective wood cream. This ensures a long-lasting, water-repellent surface which makes the product more resilient to rot and insect attack.

The distinctive look of Millboard takes skill, impeccable attention to detail and patience to achieve. The journey begins with real timber, which Millboard source from local areas and carefully select by hand, paying particular attention to the subtle nuances of the natural grain.

These timbers are then used to create the moulds for Millboard, enabling them to replicate the natural character of the original wood in our unique composite material.

To recreate the authentic look of hardwood, Millboard carefully match the colour, using multiple tinted hues for depth and subtle variation, ageing and weathering.

The beautiful, finished Millboard Product is just like the real thing, but made to last for years to come.

Weathered Oak

Beautifully aged yet utterly timeless, the hand crafted Weathered Oak collection is moulded from 100 year old reclaimed oak timber, creating a distinctive worn look – without the wait.

Garden Screening & Cladding

**Need to disguise a boring wall? We can definitely help with that!
From Composite Cladding to Timber Garden Screening.**

Image: Smoked Oak Cladding

NEW**millboard®**

Live.Life.Outside.

Millboard cladding is inspired by the beauty of nature but is built to outperform it. It is moulded from selected timbers making it look exceptionally like real wood, whilst avoiding the on-going maintenance associated with natural or wood based products.

The hand colouring of each board recreates the subtle nuances that only natural wood can give. The moulded profiles reduce labour and wastage yet retain the effect of individual boards.

- Excellent UV and weathering stability
- No extra maintenance or painting
- Perfectly replicates oak – almost indistinguishable in detail and colour
- High insulation value and improved acoustics
- Fibre reinforced – high strength – low weight
- Easy to install – cuts and screws like timber (no pre-drilling or specialist tools needed)
- Minimal expansion and contraction
- Insect and termite resistant
- Multiple grain definition - hand moulded from natural timber
- Individually hand coloured boards for natural tonal variation
- Doesn't twist or warp like timber
- Non-porous material – no sealing required
- Tongue and groove for increased rigidity, strength and water resistance
- No leeching or releasing of tannins

Sizes available:

Cedar Garden Screening

Cedar Screening Battens are an ideal choice of wood to use as garden screening, fencing and cladding as well as for a variety of other landscaping applications. The highly desirable slatted screens produce visually interesting lines and shadows that will bring plenty of texture and character to an outdoor space.

Whether laid as horizontal or vertical boards, the result is clean lines with neat proportions for an aesthetically appealing result. As well as being used to help define boundaries, Cedar Screening will provide an attractive backdrop for plants and other foliage when used as fencing.

Natural variations in the colour and graining of the wood produces a unique mixture of tones in each batten for a distinctive range of colour. This natural variation adds warmth and interest to a garden space. As cedar weathers naturally it will transition into a stunning silver-grey colour, for a more contemporary look oil stainer can be used to retain the golden-brown colour.

Batten sizes available:

17 x 38mm

Panel sizes available:

1828 x 900mm

1828 x 1200mm

1828 x 1500mm

Softwood Multi-Purpose Garden Screening

This multi-purpose screening is a versatile garden product that can be used as conventional trellising, screening or panelling, (i.e. for privacy, shade, or to fill voids under decks) or as a balustrade infill. It comes as long length laths that can be cut to the desired length.

The closer adjacent laths are fitted to one another the greater the degree of privacy. It is machined from slow grown and carefully selected Scandinavian softwood and comes with a 15 year product treatment warranty.

Sizes available:

32 x 75mm

Trellis & Arches

6" Square Trellis

This open style has multiple uses. Can be used as fencing or as an infill for pergola features.

Fencing Accessories

We have a full range of fencing accessories to suit your needs and offer a variety of flexible solutions, including fence posts, gravel boards and arris rails.

Covers' fencing material is all sourced locally in the UK from manufacturers who are dedicated to the sustainable use of timber in a range of products and in renewable heat generation.

Don't
forget

Hanson PostFix®
Concrete Poly Bag

Quick setting concrete mix
suitable for fence posts, gate
posts and garden lighting.

Fencing Accessories

A. Metpost Spike - Used in soil to help support and erect fence panels and structures.

B. Metclips - An easy way to secure trellis and fence panels to timber posts.

C. Metpost Concrete - Used in areas where a spike is impractical or simply as an alternative. Use with Postfix concrete to help support and erect fence panel posts.

D. Metpost Post Extender - Raises the height of an existing fence panel post to allow for the fitting of trellis.

E/F. Metpost Bolt Down - The wall anchor is ideal for installing posts onto an existing wall while the bolt down support is great for fixing posts (including pergolas and arches) on an existing concrete base.

Metpost Wedge Grip System 2

System 2's secure twin bolt mechanism is ideal for large projects such as pergolas and decking.

Product Code	Size
18079	75 x 600mm
18080	75 x 750mm

Metpost Wedge Grip Post Support

Ideal for fencing projects, the Wedge holds each post in a vice without the need for nails or screws.

Product Code	Size
18076	75 x 75 x 600mm
18077	75 x 75 x 750mm
18078	100 x 100 x 750mm

Metpost Plain Box Post Support

Suitable for easy post removal and replacement.

Product Code	Size
18075	50 x 450mm

Metpost Wall Anchor

A simple way to add height to a wall.

Product Code	Size
B11557	75mm

Metpost Repair Spur

Repair a broken or rotten post which has previously been concreted into the ground.

Product Code	Size
18081	75mm
18082	100mm

Metpost Flush Fit Bolt Down

Enables you to site a post against a wall.

Product Code	Size
B11522	75mm

Metpost Bolt Downs

Heavy duty bolt down post support is ideal for use with wooden fences of all types.

Product Code	Size
18086	50 x 50mm
18087	75 x 75mm

Bespoke Metal Fencing & Gates

Our new metal fencing and gate range is something rather special. Manufactured and personalised to fit perfectly into existing features within your garden, this highly impressive range provides a statement to any domestic or commercial property.

Using a water jet cutting process, we can create intricate designs and can even incorporate your own wording or designs into the fencing - adding your own unique touch.

The galvanised steel fencing is powder-coated to encapsulate the metalwork and then kilned to seal each section creating a fence that will last you many years and also provide a secure perimeter to any property.

Gates

Our gate range encompasses a range of distinguished and impressive gates that not only enhances the entrance to a property but also offers both privacy and security.

**Town Gate**

Sizes Available: 0.9 x 1.552m & 0.9 x 1.778m

**Wellow Gate**

Finish the job

Our extensive Ironmongery range includes hinges, bolts, padlocks and more, providing you with the products you need to complete any job. For all Ironmongery see page 127.

Garden Buildings & Bespoke Timber Storage

Not only can you choose from the Garden Buildings here, you can have your own bespoke items made, offering non-standard sizes to ensure you get the size that best fits your requirements. There are endless possibilities to what is available for you.

Log Store

Well made solid area to store logs for those chilly winter nights.

STORE/LOG 1200 x 600 x 1200mm

Bin Store

Designed to make a pleasing and stylish feature out of a practical necessity, with natural finish.

BINSTORE 755 x 905 x 1290mm

Potting Shed

Durable, high quality, traditional potting shed. Not every garden is the same size or shape. Made to your specification and finish.

Children's Playhouse

Built to order, by hand, the way a craftsman builds a home. This playhouse provides a space for children to explore the world through imaginative play.

Garden Tool Store

Creates the ideal storage solution for all garden equipment. Available in a variety of sizes.

Bike Shed

Creates the ideal storage solution for bikes, toys and many more uses. Available in a variety of sizes.

Artificial Grass

Say goodbye to regular weeding, watering and mowing with the help of Namgrass. Our range of artificial grass not only looks like an immaculately manicured lawn, but also feels just as soft as the real thing. All products are child and pet friendly.

Image: Eclipse Artificial Grass

NEW

Image: Utopia Artificial Grass

NEW

Utopia 43mm

Utopia is a new product to the range at Namgrass, with its generous pile height at 43mm and natural dark tones this exceptional grass is a show stopper for the ultimate garden.

NEW

Eden 26mm

Eden is the newest grass to join the Namgrass range. This entry-level product is of great value and suitable for all types of landscaping projects and designs.

10 Year Warranty

All of Namgrass' products come with a 10 year warranty giving you ultimate peace of mind whichever lawn you choose.

Artificial Grass

MADE FOR LIVING

Elise 27mm

Elise has stood the test of time within our range. It's perfect if you are wanting to gaze out at a neat and tidy lawn every day.

Exbury Bright & Dark 30mm

Make every day seem like the first day of spring with our vibrant Exbury. With a dense thatched construction, deep pile and fresh looking fibres, this is the perfect choice for a high-traffic, family garden.

Serenity 37mm

This premium product is one of our most realistic looking and feeling, benefiting from a super soft yarn making it perfect for the luxurious family garden.

Eclipse 30mm

With a 30mm pile and the softcurving fibres gives the Eclipse a natural bounce of a well kept lawn. Great for an active garden.

Wessex 32mm

Designed to improve the aesthetic of any garden within a budget. Wessex is a great option to freshen up any outdoor living space.

Barking 28mm

All of our products are suitable for dogs, however Barking has a PU backing which is less absorbent than our traditional latex grasses. Its W shaped yarn also increases durability to withstand high usage.

Kirkstall 30mm

Keep active in the comfort of your own garden with this hard-wearing product. With a neat, natural appearance and a short pile, this is another perfect choice for busy families and pet owners.

Vision 27mm

Vision is one of our most vibrant grasses. Using a thick blade this product is designed for areas that have a high footfall in mind.

Downton 37mm

Downton is a super soft grass, perfect choice for anyone that loves to spend lots of time in their garden.

Hengistbury 26mm

This great value product is suitable for use in all gardens. It will bring any outdoor space to life with its mid green toned grass yarns.

Accessories

The Namgrass accessories are a specific range of products designed to aid the installation and maintenance of Namgrass' Artificial Grass.

Joining Tape

A simple way of bonding two pieces of artificial grass when used in conjunction with our adhesive.

Adhesive

This moisture-curing adhesive can be applied in damp and cold conditions.

Cleaner

The cleaner is great for tackling dirt and pet odours, simply spray on your lawn and marks are gone in no time.

Decorative Aggregates

A wide range to choose from...

We offer a huge range of Long Rake Spar decorative aggregates to suit any garden or landscaping design. Our selection includes gravel, chippings, pebbles, cobbles, rockery stone and boulders, in a variety of colours and styles.

Boulders

Approx 250mm, a variety of colours & styles available.

Dove Grey Pebbles

Mid to light grey naturally rounded pebbles with hints of brown.

Tuscan Sunrise

New for 2021, a naturally bright chipping with a combination of peach and white colour tones.

Flamingo Chippings

A mix of peach, pink and white chippings with hues of bluish grey that has a natural sparkle.

Polar Ice Chippings

Light blue, grey and bright white chippings, ideal for paths and edging.

Blue Slate

Welsh Blue slate mulch available in 20mm & 40mm size chippings.

Tweed Pebbles

Brown and tan naturally rounded pebbles.

Green Slate

Green slate mulch available in 20mm & 40mm size chippings.

Polar White

Pure white, angular dolomite chippings suitable for pre-cast stone.

Rockery

Approx 250mm, a variety of colours & styles available.

Scottish Pebbles

A premium rounded pebble in light grey brown tones.

Plum Slate

Welsh Plum slate mulch available in 20mm & 40mm size chippings.

Onyx

A matt pale apricot beige angular chipping.

Flamingo Pebbles

A natural mix of light pink cream and white tumbled pebbles.

Cotswold

A light cream angular chipping suitable for paths or drives.

Ice Blue

Light marl grey/blue coloured angular chipping.

Black Ice

A blend of black and Ice Blue Chippings.

White Pebbles

Naturally white tumbled pebbles suitable for landscaping.

Apricot Chippings

A light golden apricot very rounded gravel.

Ocean Blue Pebbles

A range of blue/grey colour tones, available in 10, 14 and 20mm sizes.

Pea Gravel

Brown, tan coloured alluvial natural gravel.

Yorkshire Cream

Cream/Beige smooth angular chippings.

Don't forget

Weedcheck Ultra Weed Membrane can be laid down first to prevent weeds from growing in between your gravel. Find on page 122.

Topsoils *Available in Bulk Bags or Delivered Loose*

Earth Cycle topsoils are manufactured from high quality components, blended with compost to create a faultless soil for any garden or landscaping project.

To fit a variety of needs our organic and peat free topsoils are perfect for creating new gardens, allotments, raised beds and vegetable plots. They are also ideal to plant flowers or vegetables and can be used to level lawns for a neater garden you can care for with ease.

BS3882 Multi-Purpose Topsoil

Our BS3882 Multi-Purpose Topsoil is a sandy loam topsoil that is produced with our PAS100 compost and is certified to BS3882:2015 specification for Topsoil. This topsoil is for multi-purpose use and provides good support for the growth of vegetation. It is suitable for most applications used in the garden or landscaping situations.

Topsoil Supreme

Our unique Topsoil Supreme is a BS3882 Certified manufactured topsoil blended with quarried sand and 40% of our own PAS100 compost. It is ideal for multi-purpose use as it is rich with a perfect balance of natural organic nutrients and humus, with strong moisture retention ability. Great for creating new beds, lawns or vegetable plots.

BS3882 Low-Fertility Wildflower Topsoil

Specially developed and certified to BS3882:2015 specification for low fertility Topsoil. This sandy loam topsoil containing our PAS100 compost, and with a pH of 6.9, is the perfect partner for growing balanced meadow communities of native wild flowers and grasses which require a less nutrient-rich soil.

Turf Dressing Rootzone

A nutrient-packed rootzone designed for top dressing lawns, divot filling, laying turf onto and sowing seed into. Application fills any hollows that may have developed in the grass surface. You can top dress using our Turf Dressing Rootzone alongside multiple varieties of grasses. Continued application will also build an ideal soil structure and rootzone for turf over the years.

Composts

Available in Bulk Bags or Delivered Loose

All soil conditioners and composts we produce are both organic and peat free, compliant to PAS100 standard giving the nutrients your garden needs to flourish.

Compost is a vital part of a healthy garden, it is an eco-friendly way to inject much needed nutrients back into the ground aiding plant growth and improving soil structure.

Cow Compost

Earth Cycle Organic Peat Free Cow Compost is a nutrient-dense organic soil conditioner based on composted cow manure from our own award-winning organic dairy herd. It is compliant to PAS100 standard and ideal for vigorous root, shoot and bud growth in roses, vegetables, fruit and herbaceous borders.

Soil Conditioner

Our Peat Free PAS100 Compost Soil Conditioner is a nutrient-dense organic soil conditioner based on composted plant material. It's an ideal, all-round product for your general gardening and horticultural needs.

Vegetable Compost

Perfect for the vegetable patch. All the nutrients needed are released over many weeks as the peat free compost breaks down naturally in the soil. This natural slow release sustains strong root growth, flowering and fruiting and keeps foliage green and healthy by injecting the zest vegetable patches and allotments require.

Mushroom Compost

A spent Mushroom Compost which acts as a slow-release nourishing fertiliser providing high levels of phosphate, potassium, calcium, and magnesium and is great for growing vegetables, particularly brassicas due to its slightly alkaline properties.

Beds & Borders Compost

This peat-free organic compost is full of nutrients that are ideal for your beds and borders. It enriches moisture retention, which improves the drought resistance in the soil. This means that more moisture is available for your plants during dry periods, which is critical for them to flourish, giving your garden that award winning look.

Mulch

Available in Bulk Bags or Delivered Loose

Woodland Mulch

Earth Cycle Woodland Mulch provides nutrients to flowers, whilst leaving a lovely bark-like textured appearance to your borders. It is used extensively by landscapers for finishing off decorative areas around new housing estates and supermarkets due to its aesthetic qualities.

It can also help retain moisture in the soil, suppress weed growth, and contribute to soil health as it breaks down over time.

Barks

Available in Bulk Bags or Delivered Loose

All of our wood products are sourced from sustainable woodlands. They are suitable for a wide range of applications from improving the appearance of your garden to providing safety for children's play areas.

Landscaping Bark

Provides a quality graded decorative surface, which maintains soil temperature and protects plant roots from winter frost and summer sun, whilst suppressing weed growth. Our bark is produced from mixed conifer with a high percentage of spruce, with 90% of particles falling within the range of 8-35mm.

Playchip

A playground bark which is 100% British Hardwood from sustainable sources. This long lasting bark meets the technical certificate for safe use by children, which gives your playground the protection it needs for all to enjoy. With its easy maintenance and free draining, it provides a clean play surface all year long, which is suitable for all playground equipment.

Finish the look

Create a clear and beautiful divide between your flower beds and paths using bark, pebbles and sleepers.

A simple but effective way to connect different areas of your garden. Complement your paths with some lighting to light up your footpath in the summer evenings.

Don't forget to check page 60 for stepping stones.

On a budget? Loose materials, such as gravel or bark, are cheaper than brick and stone.

Don't forget

Weedcheck Ultra Weed Membrane can be laid down first to prevent weeds from growing in between your pebbles. Find on page 122.

Don't forget your jointing compound to complete the job

EASYJoint All Weather Paving Joint Compound

EASYJoint jointing compound is a very quick, effective and aesthetically pleasing way to fill joints between paving, be it natural stone or concrete flags.

It is suitable for all types of paving material provided there is a gap of at least 3mm wide and 25mm deep (narrow joint compound).

Product Code	Size	Colour
B29951	12.5Kg	Mushroom
B29952	12.5Kg	Stone Grey
B29953	12.5Kg	Basalt
B29954	12.5Kg	Buff Sand
B29955	12.5Kg	Jet Black

EASYPrime

EASYPrime is a high quality primer slurry for porcelain and natural stone paving. It provides a powerful bond between paver and wet mortar bed – ideal for porcelain paving. EASYPrime is simple and easy to use, with minimal wastage. The three 5Kg bags in the tub allow for smaller quantities to be mixed at a time.

Deliver a strong, long-lasting bond every time - with EASYPrime.

Product Code	Size
B34606	15Kg

EASYGrout

EASYGrout is a high-quality slurry grout for use on porcelain and most other paving materials.

EASYGrout mixes readily with water to give a highly flowable joint filling and grouting mortar ideal for use on floor surfaces where a high early strength, resilient, compact grout joint is needed, particularly in areas subject to early and sustained trafficking. Suitable for grouting joints internally and externally around ceramic, porcelain and natural stone tiling and clay paving slabs, filling joints from 5mm up to 25mm wide with a minimum joint depth of 20mm.

Product Code	Size	Colour
B38202	15Kg	Natural
B38203	15Kg	Light Grey
B38204	15Kg	Dark Grey

EASYSeal

EASYSeal SSP is designed to penetrate, seal and protect natural stone and concrete paving. Virtually invisible once applied, it allows the stone to "breathe" whilst protecting paving from all manner of substances, such as cooking and engine oils, grease and fat, food, ketchup, mustard and beverages such as tea, coffee and wine.

Ideal for protecting your paving against the excesses of the summer BBQ! EASYSeal SSP is water-based, thereby making it highly environmentally friendly.

Product Code	Size
B38200	5L

Finishing Touches & Accessories

EASY Black Spot Remover

Special formula that cleans paving and helps to remove and prevent return of fungal growth known as Black Spot.

Product Code	Size
B41238	3L
B41242	5L

EASY Algae Remover

Algae cleaner which contains an active ingredient which goes on cleaning for months. Keeps working for up to 12 months!

Product Code	Size
B41232	1L
B41227	750ml

EASY Algae Remove & Seal

Kills algae and seals the surface to protect against further algae growth.

Product Code	Size
B41239	3L

EASY Artificial Grass Cleaner & Sanitiser

Fresh fragrance for use on artificial grass.

Product Code	Size
B41228	750ml
B41233	1L

EASYSeal Stone Sealer & Protector

Easy to apply with a clear finish, no sheen and breathable.

Product Code	Size
B38200	5L

EASY Patio Seal & Protect

Clear, water based protection for paving.

Product Code	Size
B41225	3L

EASY Patio & Deck Cleaner

General paving and decking cleaner with benefit of continued performance after rinsing. Keeps working for up to 12 months!

Product Code	Size
B41234	1L

EASY Sealer Remover

Water-based coating remover, like paint stripper.

Product Code	Size
B41240	5L

EASY Grass & Foliage Greener

Clever green spray which improves the look of scorched grass or dead plants. Good for temporary use.

Product Code	Size
B41230	750ml

EASY Grout Residue Cleaner

Unique formula removes residue after using EASYGrout.

Product Code	Size
B38198	1L

EASY Grease & Oil Away

De-greasing liquid for use on oil and fat spillages.

Product Code	Size
B41226	500ml

Ornament & Statue Cleaner

An excellent rejuvenator for heavily soiled garden Ornaments, Statues, Headstones & Masonry. Keeps working for up to 12 months!

Product Code	Size
B41231	750ml

EASY Efflorescence Remover +

Unique formula removes salt deposits usually found on brickwork.

Product Code	Size
B41236	1L

EASY Porcelain Cleaner

Effective yet gentle cleaning of all porcelain and ceramic tiles.

Product Code	Size
B41229	750ml
B38199	1L

EASY Masonry Cleaner

Effective cleaning for paved areas, concrete paths and buildings. Non acidic.

Product Code	Size
B41241	5L

EASY Mortar Stain & Calcium Remover

Non-Hydrochloric acid cleaner for use on paving and brickwork. Removes white Calcium deposits normally found on newly laid paving.

Product Code	Size
B41235	1L

EASY4Rust

Specialist formula which only targets Iron Oxide. Usually used on Grey Indian Sandstone paving.

Product Code	Size
B41237	1L

EASYSeal Back to Black

A unique blend of resins which dramatically enhances Black Limestone natural stone paving. Use as a surface colour restorer.

Product Code	Size
B41619	1L

A glowing cylindrical outdoor light fixture stands on a stone path at night. The light is bright and warm, illuminating the surrounding area. In the background, there are dark, silhouetted trees and a body of water reflecting the light. The overall scene is serene and atmospheric.

Garden & Outdoor Lighting

It is amazing how stunning your garden can look with the addition of a few well placed lights.

This easy to install plug 'n' play light system is great for your outdoor lighting. The range is ideal for illuminating pathways, plants, shrubs, decking and features.

Place the lights anywhere in your garden and keep the cables discreet by tucking them underneath stones, dirt or whatever is in your garden. Simply just plug and go, you'll have a perfectly illuminated garden to show off to your family and friends.

- Easy to install
- Ideal for illuminating pathways, decking and features
- No tools required
- Robust cable and connection

Finish off your look with our Decorative Aggregates, found on page 114, to suit any garden or landscaping design. Our selection includes gravel, chippings, pebbles, cobbles, rockery stone and boulders, in a variety of colours and styles.

Garden Furniture

From enjoying al fresco dining to relaxing in your very own outdoor sitting area, our stylish range of high quality garden furniture is designed to suit every lifestyle.

Cordial Luxe

The new Cordial Luxe range is an on-trend collection for 2021, which has been cleverly crafted from tubular powder coated aluminium frames, which have been hand woven with marine grade olefin rope with a soft rubber core, which has a faster drying time compared to unfilled ropes.

Roble

Roble (pronounced 'Roebly') is the premium hardwood used by Alexander Rose. It is a very dense wood, similar in strength to Teak, light yellow in colour and with a smooth lustre. Over time it will age and weather to a very elegant silver patina. This will not affect the quality of the product.

Old England

The Old England furniture consists of three distinctive dining sets and a Turnberry bench – two in a painted grey finish with matching benches and one in a brushed grey finish with woven bucket chairs. The furniture is finished in a durable polyurethane paint.

General Technical Information

Efflorescence

Efflorescence can appear on all paving products as white patches or a lightening of the surface colour, but seems to disappear when wet. It is formed by a normal chemical reaction which causes calcium hydroxide (lime) to migrate through the damp paving surface and then react with carbon dioxide in the atmosphere resulting in a deposit of calcium carbonate crystals. Efflorescence is very unpredictable in its occurrence and can happen at any time of the year but is more prevalent in winter.

Although there are cleaners available, efflorescence is a natural phenomenon and will generally disappear with the natural weathering process and the passage of time. Covers cannot accept responsibility for the effect of efflorescence which can be a characteristic of all good quality products with a high cement content.

Colour Variation

Block Paving

Colour variations can occur within packs, therefore:

Ensure your paving and blocks are from the same factory as any sample you've received. Block paving should be ordered from the same batch number to avoid colour variation. Covers cannot accept responsibility once blocks are laid from different batches. Best results for laying are achieved through mixing from 3 to 5 different packs and vertical columns rather than horizontal rows. Light colours are susceptible to staining and care should be given when selecting blocks for driveways.

Natural Stone

All natural stone products will have colour and texture variation to a greater or lesser extent within single pieces and from piece to piece. We recommend a reasonable amount of product i.e. fossils, ferns, veining and quartz. Natural stone may develop added marking, deposits or patches as mineral content oxidises.

Sandstone

Many homeowners choose to seal their new paving to protect it from accidental staining and to reduce the risk of allowing algae and lichens to establish themselves on the surface and joints, discolouring the paving and masking the natural beauty of the completed work. There are many different sealants on the market, providing different finishes and often changing the appearance of the paving. High gloss sealants rarely look 'natural' and can sometimes make the treated surface slippery and unsafe. Polyurethane sealants are best suited to concrete block paving rather than natural stone. If you intend to seal your paving, make sure it is completely dry and free from efflorescence. It may take a period of time to ensure that the bed underneath has fully dried out. Always use a quality natural stone sealer and follow the manufacturer's instructions.

Slate

Slate has many natural characteristics, therefore, care should be taken when laying to aid/enhance the overall finished aesthetic appearance. In most cases this paving has more than one usable face, we strongly recommend the following checks be made:

- Select the best finished top surface to work with ensuring it is free from calcite mineral deposits (circular white marks)
- Dry lay the paving prior to final installation/fixing to ensure the desired shade variation is achieved throughout the patio area
- A slurry primer should be applied to the underside of Slate paving prior to laying to improve adhesion
- Do not use acidic based products during or after installation
- Natural Slate is not suitable for steps and copings

Concrete

Colours may vary subtly, especially in blended shades. Colours will appear different during varying weather conditions such as sunlight and rain.

Natural Granite

A slurry primer should be applied to the underside of Granite paving prior to laying to improve adhesion.

Do not use a resin based jointing compound with Granite.

Limestone

Limestone is UV sensitive and over time will lighten in colour. We do recommend sealing limestone prior to laying, or as soon after laying when practically possible. Combined colour enhancers and sealers are available that will help keep the look for longer. Never use acidic based products during or after installation.

Porcelain paving

Manufactured from the finest raw materials, under strict controls allows us to obtain the exceptional technical characteristics which sets porcelain paving apart. Do not use white cement nor materials containing black pigments. Finishes are intentionally manufactured with slightly uneven colour tones and surface decoration, these subtle variations set these products apart. The use of a slurry primer to the reverse of each paver is both essential and more importantly critical to the overall performance of porcelain paving. Applied to the underside using a stiff brush, it provides an exceptional bond between paver and the full wet bed underneath. Mixed to manufacturer's instructions and applied with care it forms an immediate bond which prevents the pavers from lifting or potentially moving in the future when correctly laid. Porcelain paving can be cut on site and mostly to any size. We recommend the use of a portable saw (table saw, petrol driven disc cutter, rechargeable angle grinder) fitted with a good quality diamond porcelain blade. The blade should be water fed for dust suppression and to keep the blade cool. Scoring the product first and sawing from the face downwards will help to alleviate the potential risk of edge/surface chipping. Porcelain paving can be cleaned by applying a suitable cleaner. We strongly recommend the finished laid area be thoroughly cleaned/washed down which helps remove general building dirt, grout residue and any grease deposits that may be present. It is also recommended that periodic cleaning with a porcelain cleaner will help to keep the paving looking its best. Dependent on the type of stain/surface residue present (i.e. suction marks, grease, grout, general building site dirt,) there is a wide range of off the shelf specialist cleaners available. Always check the manufacturer's instructions first before applying to any test area.

Maintenance

Paving materials require periodic cleaning to maintain its appearance. Regular sweeping to prevent the build-up of detritus is recommended. Light coloured blocks, whilst structurally sound for driveway use, are liable to emphasise tyre marks and oil spills on the driveway. It must be accepted that these products will need more maintenance if the overall appearance is to be maintained. Ask your local depot for care and maintenance products.

Care should be taken when buying cleaning agents as some varieties contain a concentration of acid, which can adversely affect the appearance of concrete products, clay, limestone and natural stone.

For general cleaning of dirt and algae, vigorous brushing with a stiff yard broom with plenty of hot detergent solution (washing up liquid

General Technical Information

or non-bio washing powder), thoroughly rinsed with clean water should suffice. Repeated treatment may be required for paved areas sited beneath trees or in permanent/near permanent shade. In certain circumstances, prolonged contact with wet leaves can result in staining of the paved area. Such contact should be avoided wherever practical. Certain common garden chemicals such as Ferrous Sulphate can stain paving. If chemicals are spilt on the paving remove immediately by rinsing away with clean water.

Differential Weathering

Differential weathering can cause patchy dark discolourations on the surface of individual units. Again this will generally diminish over time and will not affect long term performance. This is due to differential weathering where the surface of the paving has cured at different rates. All decorative products will weather and change appearance over time.

Sizes and Joint Widths

All dimensions quoted in this brochure are nominal and are for guidance only. Actual sizes will vary, particularly on the products designed to replicate natural stone which have features such as riven profiles and fiddled edges. Where space is critical, we recommend dry laying the product to check area required (especially circles and patio feature kits). The sizes and quantities given in the paving pages usually allow a nominal 10-15mm joint width.

Stock

Certain products may not be held as stocked items. Covers are happy to order in whatever product it is that you may require that it is not stocked.

Characteristics and Expectations

Containing wood fibres that are susceptible to differences in colour and appearance, means it is normal for SmartBoard:

- To experience some colour variation between boards
- To experience some weathering, to a lighter shade than the original colour/shade
- For the striped look of the ribbed face of boards to become less prominent with time

Having a brushed matt surface, means it is normal for SmartBoard:

- To become marked if scuffed during fitting or in use
- Marks caused by scuffing will gradually fade
- To experience tidemark type water staining after the first few bouts of heavy rain. The appearance of tide mark staining will diminish and become less apparent with time as the washing effect of rainwater and weathering effect of ultra-violet light reduces over time
- To be less resistant to staining compared to alternatives encapsulated with a 100% plastic cap/wrap

Made, in part from plastic, means SmartBoard:

- Will expand and contract across its width and along its length as the weather conditions change from season to season
- Will become hot when in direct sunlight
- Should not be installed when site conditions are excessively hot or cold

Essential SmartBoard Advice

Construction

- Fit over joists placed at 400mm centres, when boards are perpendicular to joists
- Fit over joists placed at 300mm centres, when boards are aligned at 45 degrees to joists
- Maintain a 5mm gap between ends and sides of adjacent boards
- Maintain a 10mm gap between ends and sides of boards
- Adjacent to a permanent structure/fixture

Fitting

- Fit SmartBoard over double joist construction where boards are butted end to end
- Using the drill bit supplied in each box of SmartBoard screws, pre-drill two 4.5mm pilot holes at every joist junction, taking care to maintain a 20mm distance to any edge and not to drill into the joist below. Fitting screws through pre-drilled 4.5mm holes eliminates excess drive friction:
 - Making for an easier and better job
 - Reducing the chance of damaging the screw heads protective coating
 - Making for a neater appearance, as screw head depth is easier to control regardless of the type of drive tool used
 - Making it easier to extract screws should a board need removing in the future
- Fit SmartBoard decking screws (20 per board at 400mm centres, 26 per board at 300mm centres) through 4.5mm pre-drilled holes taking care to align the head of the screw flush with the surface of the decking
- Do not use any other type of screw or fixing to fit SmartBoard

Be inspired...

Go to page 72 for our composite decking and accessories.

Covers Accounts

We have a variety of trading options to suit your requirements. Ask in depot today or download your preferred choice from **coversmerchants.co.uk** and apply today.

If you have any queries regarding your application please telephone: **0844 858 4040**

Credit Account

Covers offer a 30-day account to qualifying customers on trade terms so that you can buy everything at the right price, with account facilities of invoices and statements to your office and planned payments dates.*

For a Company Credit Account Application form for sole traders/partnerships/individuals or LTD/PLC/LLP companies, please contact either your local branch or email: **applications@coversmerchants.co.uk**

* Credit references required. Terms and conditions apply

Depot Account

The Covers Depot Account offers the benefits of a Credit Account in terms of invoices and statements but no credit is offered. Ideal for a small trader who may send one of their team to collect goods and does not wish to give them cash or to lose the invoices. For a Depot Account Application please contact either your local branch or email: **applications@coversmerchants.co.uk**

Trade Card

If you prefer to pay for things as you go, download the Covers Trade Card Application form from: **coversmerchants.co.uk** or contact either your local branch or email: **enquiries@coversmerchants.co.uk**

You get trade terms, which means you don't have to negotiate every time you pay.

DIY Discount Membership

The Covers DIY Discount Membership entitles you to purchase products at a discounted price. There are, however, certain lines which will not attract any discount. It may be used at any department in any of our depots. You can download the DIY Discount Membership Application form from:

coversmerchants.co.uk or contact either your local branch or email: **enquiries@coversmerchants.co.uk**

Web Account

Create a web account and you will be able to:

- Shop online using your termed prices agreed with your depot
- View order history and easily reorder products
- Store multiple shipping addresses
